PROFESSIONAL SUMMARY

Full-Stack Software Engineer | PHP | JavaScript/TypeScript | AWS Cloud | AI-Assisted Development with 11+ years of experience designing, building, and maintaining production web applications end-to-end — from database schema to API to UI — for enterprise SaaS and high-security platforms. Proven expertise in REST API design (versioning, authentication, rate limiting), relational database architecture (MySQL, PostgreSQL), and role-based access control with audit logging for multi-tenant systems. Backend depth in PHP (Laravel, Symfony, Yii2) and Node.js, with frontend experience in AngularJS, TypeScript, and modern JS tooling. Hands-on daily use of AI-assisted development tools (GitHub Copilot, Claude Code) alongside experience building production AI/LLM-powered features (Amazon Bedrock, OpenAI API, OCR). MS in Computer Science (Software Engineering). Experienced working across multiple concurrent projects in Agile teams with architects, QA, and product stakeholders.

SKILL SET

Programming Languages: PHP, JavaScript, SQL

Backend Development: Laravel, Symfony, Yii2, CodeIgniter, Node.js, Python (freelance backend project), REST API Design, OAuth 2.0, JWT Authentication, Webhook Integration

Frontend Development: TypeScript, AngularJS, Tailwind CSS, HTML5, CSS3, Bootstrap, AJAX

Additional Exposure: React (basic, personal projects)

AI & Intelligent Automation: GitHub Copilot, Claude Code (daily use for AI-assisted development), LLM Integration, Amazon Bedrock (Claude), OpenAI API (including chatbot-style conversational features), Prompt Engineering, AI Workflow Automation, OCR, AWS Textract, AWS Translate, Intelligent Document Processing

Laravel Ecosystem: Eloquent ORM, Queue Processing, Horizon, Task Scheduler, Sanctum, Middleware, API Resources, Events & Listeners, Notifications, Caching, Artisan Commands

Mobile Development: Native Android Development (2 published apps — Google Play), Swift/iOS (ported Android app to iOS, published on App Store for 2 years), REST API Integration, Push Notifications, Google Maps API, Firebase Cloud Messaging

Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS (EC2, S3, Route 53, CloudFront, SES, SQS, Amplify), Docker, Kubernetes, Linux, Nginx, Jenkins, GitHub Actions, CI/CD Pipelines

Architecture & Design: Microservices, Multi-Tenant SaaS, Enterprise Application Development, SOLID Principles, Design Patterns, Dependency Injection, Repository Pattern, Service-Oriented Architecture, MVC

Integrations & Technologies: Stripe, PayPal, 2Checkout, HubSpot, Twilio, Plivo, Socket.IO

Testing & Quality Assurance: PHPUnit, Pest, Unit Testing, Integration Testing, Test Case Implementation

Development Tools & IDEs: Git, GitHub, Bitbucket, Jira, Postman, Composer, VS Code, PHPStorm

EXPERIENCE

01/2022 – Present **SimplifyVMS**

Remote, PK

Senior Software Engineer

- Lead backend development of an enterprise-grade, multi-tenant SaaS Vendor Management System (VMS), delivering scalable solutions for recruitment, workforce management, invoicing, reporting, and multi-currency payment workflows.
- Implemented role-based access control (RBAC) across Super Admin, Vendor, HR, and Worker roles, with audit logging for sensitive actions (contracts, timesheets, payments) to support compliance and traceability requirements in an enterprise SaaS environment.
- Designed, developed, and maintained scalable backend services using Laravel, Symfony, and Yii2, following SOLID principles, design patterns, and secure coding practices.
- Designed and integrated secure REST APIs and third-party services to support seamless communication between internal modules and external enterprise systems.
- Leveraged Redis for caching and performance optimization, reducing database overhead, while following Git-based version control, code reviews, and CI/CD workflows to ensure reliable software delivery.

- Integrated AWS services including S3, SES, and AI services to support secure file management, notifications, and intelligent document processing.
- Developed reporting dashboards and centralized logging solutions, improving operational visibility and production troubleshooting.
- Contributed to platform modernization by participating in V2 and V3 architecture enhancements, improving scalability, maintainability, and overall system application performance.
- Managed client-specific deployments across multiple repositories and environments while collaborating closely with DevOps teams using Git, Bitbucket, Jenkins, and CI/CD pipelines.
- Worked in a fully remote Agile environment, partnering with Product Owners, QA, DevOps, DBAs, and Customer Success teams to deliver production-ready features and resolve critical production issues.

02/2018 – 01/2022 Avidtrak (Agile Support Partners)

Karachi, PK

Senior Software Engineer

- Designed and developed a high-volume call tracking and analytics platform using Symphony, enabling intelligent call routing, number provisioning, conversation recording, real-time monitoring, and comprehensive reporting.
- Engineered a scalable call center management solution supporting agent management, call routing, live monitoring, and operational analytics for enterprise clients.
- Integrated third-party services including Twilio, Plivo, Zendesk, and HubSpot to enhance communication workflows and customer engagement.
- Designed and maintained secure REST APIs — with a focus on authentication and access control — consumed by web, iOS, and Android applications across the platform.
- Owned relational database schema design, migrations, and query optimization (MySQL) for high-volume transactional workloads, including sharding strategies to maintain performance at scale.
- Worked concurrently across multiple product modules (call routing, agent management, live monitoring, reporting) alongside QA and cross-functional teams in an Agile environment.
- Engineered real-time communication features using Socket.IO to support live call events, notifications, and operational visibility.
- Improved application reliability by implementing centralized error handling, logging, and application performance optimization across production environments.

04/2016 – 01/2018 Golpik

Karachi, PK

Senior PHP Developer (Lead)

- Developed and delivered 20+ end-to-end web applications from requirements to deployment.
- Designed database schemas and backend architecture for high performance.
- Ensured responsive UI integration with backend services.
- Managed client communication and requirement analysis.

02/2015 – 03/2016 Symmetry Group

Karachi, PK

Senior PHP Developer

- Independently designed, developed, and deployed multiple end-to-end web applications, taking ownership from requirements gathering and solution design through development, testing, deployment, and post-launch support.
- Led backend architecture and database design, creating scalable, high-performance solutions using PHP and MySQL while following industry best practices.
- Developed secure REST APIs and integrated frontend components to deliver responsive, user-friendly web applications.
- Partnered directly with clients to gather business requirements, provide technical recommendations, estimate project scope, and deliver customized solutions.
- Optimized application performance through database query optimization, reusable component development, and code refactoring.
- Mentored junior developers, conducted code reviews, and promoted coding standards to improve code quality and maintainability.

10/2013 – 01/2015 TradeKey

Karachi, PK

PHP Developer

- Designed, developed, and maintained scalable marketplace modules for a high-traffic B2B marketplace, contributing to new features, system enhancements, and ongoing platform maintenance.
- Optimized complex MySQL queries and application performance, improving response times and supporting high-volume transactional workloads.
- Designed and developed reusable, modular components to improve code maintainability, consistency, and development efficiency across the platform.
- Partnered with cross-functional teams to analyze requirements, resolve production issues, and deliver high-quality software within Agile development cycles.

06/2013 – 08/2013 Codenterprise

Islamabad, PK

Software Developer Intern

- Assisted in development and testing of web applications.
- Worked in an Agile team with QA and project management.

CAREER PROJECTS

- SimplifyVMS (multi-tenant SaaS product): simplifyvms.com
- Avidtrak Android app: [Google Play](https://play.google.com/store/apps/details?id=com.avidtrak)
- Avidtrak iOS app: [App Store](https://apps.apple.com/us/app/avidtrak/id1234567890)
- Cinemato Android app: [Google Play](https://play.google.com/store/apps/details?id=com.cinemato)
- Payroll System (CAISOL) — AI-driven payroll and employee lifecycle management platform built with Laravel, featuring secure RESTful APIs protected by Laravel Sanctum, role-based access control, and intelligent workflow automation: payrollsystem.caisol.com
- ATS Vantage360 — AI-powered recruitment platform with candidate tracking, workflow automation, and intelligent hiring features: ats.vantage360.app
- TradeKey — Global B2B commerce platform: tradekey.com
- Shore Summer Rentals — Online property management platform: shoresummerrentals.com
- Love2Laundry — Automated laundry workflow system: love2laundry.com
- Avidtrak (multi-tenant product): avidtrak.com
- VectorTechSol — Full-stack solutions services platform: vectortechsolutions.com
- Caisol — Integrated digital services platform: caisol.com

API INTEGRATIONS

Payment: Stripe, PayPal, Authorize.Net, 2Checkout

Communication: Twilio, Plivo

CRM: HubSpot

Social: Facebook, Google, LinkedIn

Address Validation: PCA Predict

Logistics: Tookan

EDUCATION

01/2017 – 02/2019 MS Computer Science (Software Engineering) — Hamdard University, Karachi, PK

09/2008 – 02/2013 BS IT — NUST University, Islamabad, PK

ADDITIONAL QUALIFICATIONS

- Achieved fully funded scholarship from the National ICT & R&D Fund under the National ICT Scholarship Program 2008, for 4 years of BS IT.
- Areas of continued learning: AI Solutions, Cloud Computing, Software Architecture, Open Source.
- Participant and organizer, NUST Marathon 2011.
